Detail of the Classic Series Coped Connection

All horizontal rails are metal reinforced. Shown here in Original Series.

For over 30 years AVCON Manufacturing has been an industry leader in Structural Thermoplastic Railing Systems. We proudly assist with all project phases from design through installation.

Our Metal Reinforced Thermoplastic Railings are the perfect choice for most projects and are designed to withstand the constant abuse of “high pedestrian use” areas such as **Multi-Residential Buildings, Train Stations, Water Parks, Sports Stadiums, and Coastal Applications** and will remain looking like new for YEARS to come. AVCON provides a **Lifetime Warranty** on our Thermoplastic Railing System.

Our railings are engineered to meet and exceed all building codes and safety requirements. In addition, each system is fully customizable to fit any look or need your project may require such as **glass, decorative mesh, perforated infill panels or pickets**. Our railings can be mounted on **entrance ramps, stairs, bulkheads, balconies, parapet walls and roof tops** just to name a few. The possibilities are endless!

All of our product offerings can be viewed on our website, www.AVCON.com.
